ACKNOWLEDGEMENTS AND THANKS

This project has been beset by difficulties and has taken far longer to bring to fruition than initially expected. This makes me all the more grateful for the tolerance of members of the Korana and Griqua communities in Bloemfontein in whose midst the book was first conceived; and for the patience and loyal support I have been blessed to receive from my dear husband Renfrew, and our two adored daughters, Camilla and Aurora. Apart from the members of my own small family, my staunchest supporters were my mother Frerna and my beloved brother Marius; and I know how proud they would have been to see this work finished.

I have been fortunate to find a warmly supportive academic home as a Research Associate in the Department of General Linguistics at Stellenbosch University since 2013: for their gracious collegiality and encouragement I am deeply grateful to Christine Anthonissen, Johan Oosthuizen, and Frenette Southwood.

The project could not have been completed without financial support: for this I am thankful to the Endangered Languages Documentation Programme at SOAS, University of London, who in 2011 awarded us a small grant to fund the critically urgent fieldwork component of the project. Additional support came from Mark Kornbluh, the Dean of Arts and Science at the University of Kentucky, in the form of an invitation to spend a semester there in 2015 as a Visiting Professor in the Department of Linguistics headed by Andrew Hippisley.

In the absence of any other material support, I have largely been sustained by the unflagging kindness and encouragement of good friends and colleagues. I believe they know who they are, but the list certainly includes Roger Lass, who has been my longstanding mentor in Linguistics; Anne Solomon, a long-term corresponding friend on matters of rock art and all other things beside; the members of the Qing-Orpen Project (John Wright, Jill Weintroub, José-Manuel de Prada Samper, Jeremy Hollmann and Justine Wintjes); fellow linguists Erin Pretorius, Kate Huddleston, Alex Andrason, Erica George, Marcelyn Oostendorp, and Kerry Jones, as well as Bonny Sands (infinitely generous in her willingness to share data), and Willi Haacke (who has sent me several invaluable notes); and good comrades Horst Kleinschmidt
and Christine Crowley, Geoff Budlender and Aninka Claassens, Stephen Laufer, Barbara Nurse, Colin and Agnes Darch, and Sheila Barsel. Hospitable friends who made our stay in Kentucky a thoroughly enjoyable experience include Mark Kornbluh and Mimi Behar, Andrew Hippisley, Rusty Barrett, Fabiola Henri, Mark Lauersdorf, Mel Coffee, Carol Wilcher, Kathi Kern, Kate Black, Sue Roberts and Rich Schein and their family, Lisa Cligget, Steve and Joanna Davis, and Stan Brunn. Of course there are countless others, and I hope no-one will be offended if I have omitted a name simply through the poorness of my own memory.

I am most grateful also to Hetta Pieterse and Sharon Boshoff at Unisa Press for their enthusiastic interest in the project from the outset, to Jill Weintroub for her firm but sensitive approach to copy-editing, and to my old comrade Omar Badsha at South African History Online (SAHO), whose offer to assist with the electronic aspects of the publication came at a time when my spirits were once again at a low ebb. Warm thanks also to Leander Gaum and Ian Africa at SAHO for their painstaking work on the electronic component of the project.

The costs of production were partially subsidised, and the publishers are grateful in particular to the South African National Institute for the Humanities and Social Sciences for the grant received from them. We are all grateful also to André Odendaal for the financial support and personal encouragement he has given to this project via African Lives.
